

PAX Energy
Capability Statement

Simplifying Commercial Battery Solutions

1 About PAX Energy

PAX is an Australian engineering-led company specialising in commercial and industrial (C&I) Battery Energy Storage Systems (BESS). We deliver complete, engineered solutions that ensure easy installation for accredited installers and optimal long-term performance for commercial customers across Australia's unique conditions.

Our Mission: Commercial battery solutions are challenging – PAX makes them easy.

2 We Understand Your Challenge

For Installers:

You see the opportunity in C&I battery projects but face incomplete solutions from suppliers who expect you to fill engineering gaps. You deserve a partner who provides complete systems with full technical support and the expertise to expand your capabilities.

For Commercial Customers:

You need reliable, long-term energy storage solutions but worry about system performance, ongoing support, and choosing the right technology. You want confidence that your investment will deliver results with dependable local support over the next decade.

PAX Energy bridges these gaps with complete engineered solutions backed by our Australian team, making installation straightforward and system performance predictable with 10 years of ongoing support.

3 Our Complete Pre-Assembled BESS Solution

PAX delivers fully integrated, pre-assembled battery energy storage systems designed specifically for Australian commercial applications. Every component is carefully selected through deep technical partnerships with trusted suppliers, ensuring seamless integration and optimal performance.

This delivers straightforward installation processes and optimised system performance with predictable, long-term reliability backed by our Australian expertise.

4 The Whole 9 Yards

Engineering Design Support

1. Complete guidance through sale, design, application and commissioning

BESS Solution

2. **Battery Storage** – Battery modules selected from proven suppliers, fit for purpose.
3. **Power Conversion System** – Hybrid inverters with seamless on/off-grid performance.
4. **Solar Integration** – Solutions Designed for AC & DC Coupling PV
5. **Integrated Switchgear** – Circuit Protection, Transfer Switch, AC Combiner.
6. **Energy Management System** – Comprehensive control and monitoring platform.

Flexible Finance

7. **Finance Options** – Short-term Finance and Energy-as-a-Service Solutions.

Ongoing Partnership

8. **Ongoing Support** – 10 Years of Energy Transition Guidance, Technical Support & Warranty.
9. **Innovation Pipeline** – Dedicated R&D & Installer Training for Innovative Technologies.

5 Why Choose PAX Energy

Deep Engineering Expertise: Australian-based team with extensive local conditions knowledge.

Complete Solutions for Installers: Pre-assembled BESS systems ready for straightforward installation, plus comprehensive training to help you close deals and expand into the C&I market.

Long-term Partnership: Guiding customers through 10 years of energy transition.

Strong Supplier Relationships: Deep technical partnerships ensure optimal component selection.

AI-First Approach: Optimising our operations with cutting-edge technology for the modern age.

Innovation Leadership: Dedicated capability to innovate our solutions at the forefront of the industry.

6 Getting Started

Whether you are an installer looking to expand into the C&I market with comprehensive training and support, or a commercial customer seeking reliable energy storage solutions designed for Australian conditions, PAX Energy is your complete partner.

We provide site assessment, complete system design, pre-assembled BESS, installer training, and 10 years of ongoing Australian-based support to ensure your project delivers exceptional results.

**Don't settle for incomplete solutions or overseas support.
Choose PAX – Australia's complete C&I battery energy storage partner.**
